

Medications with Quantity Limits

Updated May 2025

A quantity limit (QL) defines how much of a particular drug patients can get during a specific time period (days supply limit) or the maximum days supply that patients can get at once (quantity per days supply limit). The Kaiser Permanente Pharmacy and Therapeutics Committee determines if a drug should have a quantity limit. Quantity limits are put in place for medications that are FDA-approved for short-term use, for medications that may result in adverse effects when overused, or for medications that may be inappropriately overused. Prescriptions for quantities or durations above specified limits may be reviewed for medical necessity. Drug specific formulary status, plan benefits, and other utilization management (e.g., prior authorization, step therapy) apply.

KEY

Dispensing unit = standard metric unit per dispense (e.g., number of tablets, volume of transdermal gel, number of pens for injection)

DRUG / FORM / DOSE	ROUTE	DAYS SUPPLY LIMIT	QUANTITY PER DAYS SUPPLY LIMIT
8-MOP CAP 10MG	ORAL	Days supply limit is 30 days	
ABILIFY MAIN INJ 300MG	INTRAMUSCULAR	Days supply limit is 30 days
