

## Self-Administered Specialty Drugs\*

Current 4/1/25

Newly marketed prescription medications may not be covered until the Pharmacy & Therapeutics Committee has had an opportunity to review the medication to determine if the medication will be covered and if so, which tier will apply based on safety, efficacy, and the availability of other products within that class of medications. The current list of newly marketed drugs can be found on our [New to Market Drug list](#).

### Important:

- Prior Authorization (PA) requirements may vary. Certain specialty drugs may not be covered by certain plans.
- Refer to the member contract benefit for inclusion in the PA program and medication guide for determination of coverage ([Prior Authorization Program Information and Forms](#)).
- Member cost share may be higher for [self-administered specialty drugs](#) not obtained at in-network specialty pharmacies Accredro or CVS/Caremark Specialty Pharmacy.
  - CVS/Caremark is our preferred in-network pharmacy for hemophilia products.
- Certain specialty drugs may only be available from a specific specialty pharmacy or pharmacy location. These drugs are considered Limited Distribution Drugs (LDD). The appropriate dispensing pharmacy can be found here: [Limited Distribution Drugs](#)
- If you have questions or need further assistance after consulting this table, please call:
  - Customer Service (phone number found on the back of your insurance card)
  - Provider Contact Center: 1-800-727-2227 (**health care providers and office staff only**)
