

## Laboratory Testing

---

### Policy

Oscar reimburses for medically necessary, covered laboratory testing. This policy describes reimbursement for specific laboratory testing services.

#### 25-Hydroxy Vitamin D and 1,25-Dihydroxy Vitamin D testing

Routine use of laboratory assays to document Vitamin D deficiency remains controversial. The current United States Preventive Health Service Task Force recommendations consider current medical evidence insufficient to assess the balance of benefits and harms of screening for Vitamin D deficiency in asymptomatic adults. The American Society for Clinical Pathology recommends against performing population-based screening for 25-OH-Vitamin D deficiency as part of the Choosing Wisely campaign. The Endocrine Society similarly recommends not to “routinely measure 1,25 dihydroxyvitamin D unless the patient has hypercalcemia or decreased kidney function.” Per reimbursement guidelines from the American Association of Clinical Endocrinologists and The American College of Endocrinology, “Reasonable approaches to vitamin D assessment and treatment include an initial measurement of 25(OH)D in patients at risk of deficiency, or alternatively, vitamin D supplementation and subsequent 25(OH)D measurement 3-4 months later to assess dose adequacy.” Laboratory testing is appropriate in higher risk patients when results will be used to institute more aggressive therapy. Based on the above, CMS has limited coverage among Medicare beneficiaries for 25-hydroxy and 1,25-dihydroxy vitamin D assays.

### Reimbursement

Claims for 25-hydroxy and 1,25 dihydroxy vitamin D testing will be reimbursed if they include one of the codes on CMS’ ICD-10 diagnosis codes list that supports Vitamin D testing, or one of the codes Oscar has added to that list. Claims for Vitamin D tests that do not include a diagnosis code from the Vitamin D Testing diagnosis code list will be denied.

### Coding

CPT / HCPCS codes applicable to this policy include:

Code	Description	Notes
82306	Vitamin D; 25 hydroxy, includes fraction(s), if performed	
82652	Vitamin D; 1,25 dihydroxy, includes fraction(s), if performed	
0038U	Vitamin D, 25 hydroxy D2 and D3, by LC-MS/MS, serum microsample, quantitative	

ICD-10 codes for conditions with indications for vitamin D testing are listed below. Diagnosis codes must be applicable to the patient’s symptoms or conditions and must be consistent with documentation in the patient’s medical record.
