

**Coverage for Specialty Medications**

The Specialty Drug Management List is a list of medications that our plans identify as being a specialty medication.

Specialty medications are often prescribed to treat complex and/or chronic conditions, such as multiple sclerosis, hepatitis C and rheumatoid arthritis. These medications may have special handling and/or storage needs. Coverage for specialty medications that are FDA approved for *self-administration* are often provided through your *pharmacy* benefit plan. Specialty medications that are FDA approved for administration by a health care professional are often covered under your *medical* benefit plan. Some medications on the Specialty Drug Management List may be covered by either the pharmacy or medical benefit. So, these medications will appear under both the pharmacy and medical sections. The Specialty Drug Management List is not all inclusive and is subject to change. The listing of the drug on this list does not guarantee coverage. If you have any questions, call the number on your member ID card.

Drugs Covered Under Your Pharmacy Benefits:

Please note: You may need approval before these drugs can be considered for coverage. Your doctor can find request forms at bcbsil.com/provider. Your doctor can also call the number on your ID card with any questions about your benefits. Based on the terms of your benefit plan, you may need to fill these prescriptions at an in-network specialty pharmacy to get the most out of your benefits. Call the number on your member ID card to help locate an in-network specialty pharmacy near you. BCBSIL members who use oral oncology or hemophilia specialty drugs may have other in-network specialty pharmacy options.
