

Kaiser Permanente Colorado Specialty

Kaiser Permanente utilizes a list of medications that are considered to be specialty drugs. Specialty drugs include self-administered injectables, medications that are typically high cost or medications that require special dispensing and/or monitoring. Some prescription drug plans have a different cost share for specialty drugs. The details of your prescription drug plan can be found in your *Evidence of Coverage, Membership Agreement, or Certificate of Insurance*. This listing does not apply to the Federal Employees Health Benefits (FEHB) plans.

Kaiser Permanente utilizes drug formularies. A drug formulary includes the list of prescription drugs that are preferred and have been approved for our Members. Coverage under your prescription drug plan is determined by the drug formulary; however, many drug plans have specific exclusions, copays or coinsurances that are not reflected in the drug formularies. The drug formularies can be found at **kp.org**. All drug product strengths, formulations, and package sizes &/or types of a formulary drug may not be included on the formulary, check with your Kaiser Permanente pharmacist for clarification, if needed. Please refer to the formulary at **kp.org** for a complete listing. Drugs designated as non-formulary are not covered unless Kaiser Permanente determines that they are medically necessary through the formulary exception process.

Kaiser Permanente Colorado Commercial Specialty Tier Drug List

Bold = Formulary & *Italics = Non-Formulary* require authorization through the formulary exception process.

The Specialty Tier drug list is subject to change at any time.
