Introduction

Florida Blue and Florida Blue HMO are pleased to present the NetResults-A Medication Guide. This is a general guide that includes an abbreviated listing of Brand and Generic medications that are covered under your plan. Since coverage for medication varies by the plan purchased by you or your employer, it's important that you refer to your plan documents for complete coverage details. When we refer to "plan documents" we are referring to one or more of the following: Benefit Booklet, Certificate of Coverage, Contract, Member Handbook or prescription drug endorsement.

The NetResults-A Medication Guide provides helpful tips on how to make the most of your pharmacy benefits and details about the various coverage programs that are designed to provide safe and appropriate medication when you need it. Changes in the formulary can occur over time and the most up-to-date listing can always be found by viewing the [Medication Guide online at www.floridablue.com](http://www.floridablue.com) or by calling the customer service number listed on your member ID card. For the hearing impaired, call Florida TTY Relay Service 711.

If you are a current member, we encourage you to log on to your member account for plan specific details about your medication coverage. Go to www.floridablue.com, click on the Members tab. Once registered, you can look up a medication by name and compare your cost at different pharmacies. You'll see notes that indicate if a medication requires a prior authorization or is not covered by your plan.

NOTE: The decision concerning whether a prescription medication should be prescribed must be made by you and your physician. Any and all decisions that require or pertain to independent professional medical judgments or training, or the need for, and dosage of, a prescription medication, must be made solely by you and your treating physician in accordance with the patient/physician relationship.

Key Tips and Coverage Guidelines

By following these simple guidelines, you will be assured that you are getting the maximum benefit from your plan.

- When you have your prescriptions filled, ask your pharmacist if a generic equivalent is available. Generic medications are usually less expensive, and most generics are covered unless specifically excluded under your plan documents.
- Select Brand Name medications are included in the formulary and are therefore available to you through your plan. The List includes all covered brand name medications unless specifically excluded under your plan documents.
- Take this Guide with you when you visit your doctor or health care provider so that he or she is aware of the drugs listed and cost impacts when you discuss medication options.

Medication List

The Medication Guide includes the Preferred Medication List and some commonly prescribed Non-Preferred prescription medications. The Preferred Medication List reflects the current recommendations of Florida Blue and is developed in conjunction with Prime Therapeutics' National Pharmacy & Therapeutics Committee.

NOTE: This is not a complete listing of all covered prescriptions medications. Florida Blue reserves the right to modify (add, remove or change) the tier or apply limits of coverage to any prescription medication in this Medication Guide at any time.

For your out-of-pocket expenses to be as low as possible, please consider asking your doctor to prescribe generic medications, or if necessary, brand name medications that are included on the List. This will help ensure that your covered medications are allowed and reimbursed under your plan. In addition, consider using a participating pharmacy to obtain your covered medications because your out-of-pocket expenses should be lower than if you used a non-participating pharmacy.

To save the most money on medications, share this Medication Guide with your doctor or health care provider at each visit so he or she is aware of the drugs listed and cost impacts when you discuss medication options.

Changes to the formulary

This guide includes the medication list which reflects the current recommendations of Florida Blue and is developed in conjunction with Prime Therapeutics' National Pharmacy & Therapeutics Committee. Florida Blue reserves the right to add or remove or change the tier of any medication in this Medication Guide at any time.

The medication list is reviewed quarterly to examine new medications and new information about medications that are already on the market concerning safety, effectiveness and current use in therapy.

There are varying reasons changes are made to the medications listed in the Medication Guide:

- The tier level of a medication included on the medication list may increase (change to a higher tier or non- covered) when an FDA-approved bioequivalent generic medication becomes available.
- Newly marketed prescription medications may not be covered until the Pharmacy & Therapeutics Committee has had an opportunity to review the medication, to determine whether the medication will be covered and if so, which tier will apply based on safety, efficacy and the availability of other products within that class of medications. Go to [New to Market Drug List](#) for the most up-to-date information.

The most up to date information about modifications to the medications listed in this Medication Guide can be found by: Going to www.floridablue.com.

- Click on the **Members** tab.
- Click on the **Login Now** button and either **Login** or **Register**.
- Once Logged in, click on **My Plan**, then select **Pharmacy** under Additional items.
- Under Pharmacy Resources, click on **Medication Guide & Specialty Pharmacy**
- Under **Medication Guide/Approved Drug Lists**, click [NetResults Medication Guide](#).
- Medication Guides are posted every January, April, July, and October

Your Share of Expenses

Your cost share will depend on which cost share tier the medication is assigned. You can determine your out-of-pocket amount for medication by reviewing your Schedule of Benefits.

If you or your provider requests a covered brand name medication when there is a generic medication available; you will be responsible for:

- the difference in cost between the generic medication and the brand name medication; and
- the cost share applicable to brand name medication, as indicated on your Schedule of Benefits.

Example: If your drug copay is \$10 for generic and \$40 for brand, and you choose a brand name drug when a generic is available, here is what you might pay.

Difference in Drug Cost is \$70 (Brand Drug Cost \$120- Generic Drug Cost \$50) + Brand Co-Pay \$40 =

\$110 is Your Total Cost.

Pharmacy Benefits

The pharmacy benefit has six parts/components, called Tiers. This means that covered medications must be included in one of the following Tiers, unless specifically excluded by your plan:

Tier 1: Preferred Generic Prescription Medications

Tier 2: Non-Preferred Generic Prescription Medications

Tier 3: Preferred Brand Name Prescription Medications

Tier 4: Non-Preferred Brand Name Prescription Medications

Tier 5: Preferred Specialty Medications

Tier 6: Non-Preferred Specialty Medications

Medications that are not covered

Your pharmacy benefit may not cover select medications. Some of the reasons a medication may not be covered are:

- The medication has been shown to have excessive adverse effects and/or safer alternatives.
- The medication has a preferred formulary alternative or over-the-counter (OTC) alternative.
- The medication is no longer marketed.
- The medication has a widely available/distributed AB rated generic equivalent formulation.
- The medication has not been approved by the FDA.
- The medication has been repackaged — a pharmaceutical product that is removed from the original manufacturer container (Brand Originator) and repackaged by another manufacturer with a different NDC.
- The medication is not covered because of safety or effectiveness concerns.
- The medication is not covered for weight loss indication. See your Schedule of Benefit for additional details on coverage.

NOTE: To determine the medication exclusions that apply to your plan, check your plan documents.

Coverage details are also available to you by logging into the member section of www.floridablue.com.

Condition Care Rx Program

The Condition Care Rx Program is designed to help manage the cost of medications used to treat certain chronic conditions and encourage medication adherence. If members have the Condition Care Rx Program as part of their benefits, they can purchase medications from the Condition Care Rx Program Value/Health Savings Account Preventive List at a reduced cost.

A list of medications that are part of the Condition Care Rx Value Program may be found at:

[Condition Care Rx Program Value List](#).

A list of medications that are part of the Condition Care Rx Program for Health Savings Account (HSA) compatible plans may be found at: [Condition Care Rx Program HSA Preventive List](#).

Note: Check your plan documents to determine if the Condition Care Rx Program applies to your plan and the applicable cost share. Coverage details may also be available to you by logging into the member section of www.floridablue.com or by calling the customer service number listed on your member ID card.

Generic drugs

Florida Blue encourages the use of generic medications as a way to provide high-quality medications at a reduced cost. Generic medications are as safe and effective as their brand name counterparts and are usually considerably less expensive.

A Food and Drug Administration (FDA) approved generic medication may be substituted for its brand name counterpart because it:

- Contains the same active ingredient(s) as the brand name medication.
- Is identical in strength, dosage form, and route of administration.
- Is therapeutically equivalent and can be expected to have the same clinical effect and safety profile.
- Check with your doctor or health care provider to determine if switching to a generic medication is appropriate for you.

Oral Chemotherapy Drugs

Oral chemotherapy drugs are drugs prescribed by a physician to kill or slow the growth of cancerous cells in a manner consistent with the national accepted standards of practice. A list of these drugs can be found at: [Oral Chemotherapy Drug List](#)

NOTE: Check your plan documents to determine if this benefit applies to your plan. Coverage details are also available to you logging into the member section of www.floridablue.com.

Patient Protection Affordable Care Act (PPACA) Preventive Services

- Preventive medications - Certain preventive care services, medications, and immunizations are covered at no cost share when purchased at a participating pharmacy. A list of medications currently covered under PPACA may be found at: [Preventive Medications List](#).
- Immunizations - Certain vaccines which are covered under your preventive benefit can be administered by pharmacists that are certified. Not all pharmacies provide services for vaccine administration. It is important to contact the pharmacy prior to your visit to ensure availability and administration of the vaccine. Otherwise, contact your doctor for availability and administration of the vaccine. A list of vaccines that are covered under your pharmacy benefits may be found at: [Pharmacy Benefit Vaccines List](#).
- Women's preventive services - Certain contraceptive medications or devices (e.g., oral contraceptives, emergency contraceptive, and diaphragms) are covered at no cost share when purchased at a participating pharmacy. A list of medications and devices covered under this benefit may be found at: [Women's Preventive Services List](#)

Tier Exception Requests for Contraceptives & HIV Pre-Exposure Prophylaxis (PrEP)

If, for medical reasons, you need a contraceptive or HIV PrEP medication that is not included on these Preventive Service list(s), you may request an exception to waive the otherwise applicable cost sharing for your medication. To request an exception, your doctor must complete and submit request online at covermymeds.com or by fax using the Exception Request Forms in links below.

[Contraceptives Tier Exception Request Form](#)

[HIV PrEP Tier Exception Request Form](#)

Specialty Pharmacy medications: Covered Specialty Medications as indicated in the Medication List. Your plan may include a separate cost share for Specialty Medications. Since coverage for medication varies by the plan purchases by you or your employer, it's important that you refer to your plan documents for complete coverage details.

Specialty Pharmacy medications are high-cost injectable, infused, oral or inhaled medications that generally require close supervision and monitoring of the patient's therapy.

Specialty Drugs are only covered when they're dispensed from a Specialty Pharmacy, up to a one-month supply. Certain Specialty Pharmacy products may vary from the one-month supply. These Specialty Drugs may be dispensed in lesser or greater quantities due to manufacturer package size or FDA-approved dosage requirements for a course of therapy. A list of medications covered under this benefit may be found at: [Specialty Drugs with Extended Day Supply](#).

NOTE: Check your plan documents for information on how Specialty Pharmacy medications are covered on your plan. Coverage details are also available by calling the customer service number listed on your member ID card. Specialty Medications are divided into two categories:

- Self-Administered Specialty Medications – Patients administer these Specialty Pharmacy medications themselves. Because these medications are intended to be self-administered, these medications may not be covered if administered in a physician's office. If these medications are not obtained from a participating Specialty Pharmacy, out-of-network cost shares will apply (where out-of-network coverage is available). [A current listing of Self-Administered Specialty Medications can be found here.](#)
 - Self-administered injectable medications are designated in the Medication List with "inj" following the medication name (e.g., enoxaparin inj). No other Self-administered injectables will be covered unless such injectable is identified as a Specialty Drug in this Medication Guide. Self-administered injectables will be subject to the Brand or Generic cost share, as described in your Schedule of Benefits. Florida Blue reserves the right to change the Self-administered injectables covered through your plan at any time and for any reason.
- Provider-Administered Specialty Medications – These medications require the administration to be performed by a physician. The Specialty Pharmacy medications are ordered by a provider and administered in an office or outpatient setting. Provider-administered Specialty Pharmacy medications are covered under your *medical* benefit. [A current listing of Provider-Administered Specialty Medications can be found here.](#)

Pharmacy Options

There are two different types of pharmacies for you to be aware of as you decide where to get your prescriptions filled – retail pharmacies and specialty pharmacies. To save the most money, before you get a prescription filled, you should confirm which pharmacy is considered ‘in-network’ for that particular medication.

Participating Pharmacy

- **Retail Pharmacy Network** – Non-Specialty ‘Generic’ medications and ‘Brand Name’ medications listed in the Medication Guide can be filled at these pharmacies at a lower cost to you than other pharmacies in your area. If you go to a non-participating pharmacy, your prescription will cost you more.
- **Specialty Pharmacy Network** – We have identified certain drugs as specialty drugs due to requirements such as special handling, storage, training, distribution, and management of the therapy. These drugs are listed as a ‘Specialty Drug’ in this Medication Guide. To be covered under your pharmacy program at the in-network cost share, they must be purchased at a preferred Specialty Pharmacy. These pharmacies are **different** than the retail pharmacies and are identified in both the Provider Directory and this Medication Guide. Using an in-network Specialty Pharmacy to provide these Specialty Drugs lowers the amount you pay for these medications.
 - Limited Distribution (LD) Pharmacy – Drug manufacturers will choose one or a limited number of specialty pharmacies to handle and dispense certain specialty drugs. Typically, these drugs are costly and require special monitoring and prior authorization (pre-approval). The pharmacy that dispenses your limited distribution drug can be found here: [Limited Distribution Drugs](#)

Non-Participating Pharmacy

- If your plan offers out-of-network pharmacy coverage, choosing a non-participating pharmacy will cost you more money. You may have to pay the full cost of the medication and then file a claim for benefit determination. Our payment will be based on our Non-Participating Pharmacy Allowance minus your cost share. You will be responsible for your cost share and the difference between our Allowance and the cost of the medication.
- If your plan doesn’t offer out-of-network pharmacy coverage, choosing a non-participating pharmacy may risk your ability to be reimbursed. You may have to pay the full cost of the medication.

Participating Specialty Pharmacy Provider

If you are currently taking a Specialty Pharmacy medication, then your network for Specialty Pharmacies is limited to the following participating Specialty Pharmacy providers. Unless indicated below, any other pharmacy is considered a non-participating Specialty Pharmacy even if it participates in Florida Blue’s networks for non-Specialty Pharmacy medications.

Florida Blue is a trade name of Blue Cross and Blue Shield of Florida, Inc. Florida Blue HMO is a trade name of Health Options, Inc., an affiliate of Blue Cross and Blue Shield of Florida, Inc. These companies are Independent Licensees of the Blue Cross Blue Shield Association.

Note: Specialty Pharmacy medications are not covered when purchased through the Mail Order Pharmacy.

Self-administered specialty medications as classified by Florida Blue outside of the state of Florida may be obtained by a member with a written prescription through the preferred specialty pharmacy providers [Accredo](#) or [CVS/Caremark Specialty](#).

If a member resides or is traveling outside the state of Florida and needs to receive a provider-administered specialty medication, the prescribing physician should coordinate with the participating specialty pharmacy provider for their area or contact the local BlueCross and BlueShield Plan. This coordination can help ensure members receive their medications at the in-network cost share.

Members that receive a written prescription directly from their provider for a provider-administered specialty medication should contact customer service for further assistance.

Home Delivery Pharmacy Most plans home delivery pharmacy is serviced by [Amazon Pharmacy](#). To confirm your home delivery pharmacy provider, log into [floridablue.com](#) and view the home delivery section in your member account for additional details.

NOTE: If the original prescription was filled at a pharmacy other than the home delivery pharmacy, a new, original three-month supply prescription with a quantity of up to a three-month supply and not less than a two-month supply will be required. Prescriptions may not be transferred from a retail pharmacy to the home delivery pharmacy.

Three-month supply

In addition to being able to obtain up to a three-month supply of medication through our mail order pharmacy, you may be able to receive up to a three-month supply of your medication through a participating retail pharmacy.

Please refer to your Benefit Booklet, Certificate of Coverage, Contract, Member Handbook or prescription drug endorsement for complete coverage details.

Utilization Management Programs

Prior Authorization Program

The Prior Authorization Program encourages the appropriate, safe and cost-effective use of medication. If you are currently taking or are prescribed a medication that is included in the Prior Authorization Program, your physician will need to submit a request form in order for your prescription to be considered for coverage. If you do not request and/or receive prior approval, the medication will not be covered. A current listing of drugs requiring prior authorization are indicated in the prior authorization column following the product name in the medication list.

Florida Blue reserves the right to change the medications that require Prior Authorization at any time and for any reason.

NOTE: Some groups may customize their pharmacy plan to exclude prior authorization requirements, so it is important to check your plan documents to determine if prior authorization requirements apply to your plan. Coverage details are also available to you by logging into the member section of www.floridablue.com

NOTE: Prior Authorizations expire on the earlier of, but not to exceed 12 months for most medications:

- The termination date of your policy or
- The period authorized by us, as indicated in the letter you received from us.

Obtaining Prior Authorization

Information about **Prior Authorization** and forms for how to obtain a prior authorization approval can be found here: [Prior Authorization Program Information and Forms.](#)

NOTE: Your provider is required to complete and submit the Prior Authorization form in order for a coverage determination to be made.

1. Once a decision is made, you and/or your doctor will be informed of the decision.
2. If the decision is made to authorize coverage, the medication(s) and/or supplies may be obtained from a participating pharmacy or at the appropriate location if the medication(s) will be administered by a health professional. Prior authorization approval does not waive your cost share.
3. If a decision is made to deny authorization, you are free to purchase the prescription medication, supplies or over-the-counter (OTC) medication, but you will have to pay the full cost of the medication and will not be entitled to reimbursement under your plan.

NOTE: You have the right to request an appeal if prior authorization is denied. Please refer to the “How to Appeal an Adverse Benefit Determination” subsection of the Claims Processing or Appeal and Grievance Process section in your current plan documents for information on how to file an appeal.

Responsible Quantity Program

The Responsible Quantity Program encourages the appropriate, safe and cost-effective use of medication by setting a maximum quantity per month for a medication or supply. The quantity limitations are based on the Food and Drug Administration guidelines and the manufacturer's dosing recommendations. Medications that are subject to this program are indicated in the quantity limits column following the product name in the medication list.

Florida Blue reserves the right to change the Drugs and the quantity limits subject to the Responsible Quantity Program at any time and for any reason. In cases where a larger quantity of a Responsible Quantity Drug is medically required, your doctor or health care provider can request an override.

Information about the Responsible Quantity Program and steps for how to obtain an exception can be found [here](#):

[Responsible Quantity Program Information](#)

[Responsible Quantity Authorization Form](#)

Responsible Steps Program

The Responsible Steps Program promotes the appropriate, safe, and effective use of medications and helps you save on prescriptions. Responsible Steps is based on nationally recognized therapeutic guidelines, clinical evidence, and research. Prescription medications included in the Responsible Steps Program are not covered unless you have tried one or more covered alternative medications first.

A list of current drugs included in the Responsible Steps Program may be found here: [Responsible Steps Program Information and Authorization Forms](#)

Coverage Protocol Exemption

Your doctor may want to prescribe a medication for a condition that is different from the step-therapy protocol developed by Florida Blue. If this is the case, either you or your doctor can request an exemption by submitting a [Coverage Protocol Exemption Request](#).

Notice

This Medication Guide shall not extend, vary, alter, replace, or waive any of the provisions, benefits, exclusions, limitations, or conditions contained in your plan documents. In the event of any inconsistencies between the Medication Guide and the provisions contained in your plan documents, the provisions contained in your plan documents shall control to the extent necessary to effectuate the intent of Blue Cross and Blue Shield of Florida and Health Options, Inc.

How to use this Drug list

Column 1: Drug Name

The drug list is organized into broad categories (e.g., HORMONES, DIABETES AND RELATED DRUGS). Please use the drug search function (Ctrl+F) to find current information for drugs on the drug list. Generic drugs are shown in lower-case **boldface** type. Most generic drugs are followed by a reference brand drug in (parentheses). Some generic products have no reference brand. Brand prescription drugs are shown in capital letters followed by the generic name. The Requirements/Limits column displays information about whether that drug requires prior authorization, responsible step, limited distribution, or quantity limits. Below are the meanings of the indicators used in the Drug Tier and Requirements/Limits columns.

Column 2: Drug Tier

Indicates the formulary tier level for each drug.

Drugs with an “*” next to the tier number indicate that this drug may not be covered. Please refer to your plan documents.

Column 3: Specialty (SP)

Indicates this is a self-administered specialty drug.

Note: Additional information about specialty drugs can be found in this document under Specialty Pharmacy medications, Self-Administered.

Column 4: Requirements/Limits

- Prior Authorization (PA)- Some drugs require prior authorization to ensure appropriate use and prescribing before a drug will be covered. Coverage may be approved after certain criteria are met. Approval is required for claims to process at network pharmacies. If the PA indicator is present, then the PA program noted is possibly applied to your benefit.
- Responsible Steps (ST)- Requires members to try another drug that may be more safe, clinically effective and, in some cases, less expensive, before a more expensive drug will be approved. If the ST indicator is present, then the ST program noted is possibly applied to your benefit.
- Limited Distribution (LD)- Drug manufacturers will choose one or limited number of specialty pharmacies to dispense drugs. Additional information about limited distribution drugs can be found in this document under Participating Pharmacy.
- Quantity Limits (QL)- Certain drugs have quantity limits to encourage safe and appropriate use. The quantity limit is the maximum quantity that can be dispensed over a given period of time. If the QL indicator is present, then the QL program noted is possibly applied to your benefit.

Some plans may have Utilization Management (UM) programs (e.g., PA, QL, and ST) on additional drugs beyond those noted in this document.
