Background

Surgery may safely be performed in various settings. Some of the common settings used are an inpatient hospital or medical center, an off-campus outpatient hospital or medical center, an on-campus outpatient hospital or medical center, an ambulatory surgical center, or a doctor's office. Costs for surgical procedures may vary among these different settings. To encourage the use of the most safe and appropriate, cost-effective sites of care for certain medically necessary outpatient surgical procedures, prior authorization is required* to ensure the appropriate site of care for the surgical procedures linked below.

We will review the site of care for medical necessity for certain elective surgical procedures. Site of care is defined as the location where the surgical procedure is performed, such as an off campus-outpatient hospital or medical center, an on campus-outpatient hospital or medical center, an ambulatory surgical center, or an inpatient hospital or medical center.

*To verify authorization requirements for a specific code by plan type, please use the Pre-authorization Code Check.

Policy

For Non-Medicare Members

This will be implemented using a phased approach, starting with Benton, Kitsap, Spokane, and Whatcom counties.

- I. Certain planned surgical procedures performed in a hospital outpatient department are considered medically necessary for an individual who meets **ANY of the following** criteria:
 - Advanced liver disease (MELD Score > 8)
 - Advance surgical planning determines an individual requires overnight recovery and care following a surgical procedure
 - Anticipated need for transfusion
 - Bleeding disorder requiring replacement factor or blood products or special infusion products to correct a coagulation defect
 - o Brittle Diabetes
 - Cardiac arrhythmia (symptomatic arrhythmia despite medication)
 - Chronic obstructive pulmonary disease (COPD) (FEV1 <50%)
 - Coronary artery disease ([CAD]/peripheral vascular disease [PVD]) (ongoing cardiac ischemia requiring medical management recently placed [within 1 year] drug eluting stent)

- Developmental stage or cognitive status warranting use of a hospital outpatient department
- End stage renal disease ([hyperkalemia above reference range]; peritoneal or hemodialysis)
- History of cerebrovascular accident (CVA) or transient ischemic attack (TIA) (recent event [< 3 months])
- History of myocardial infarction (MI) (recent event [< 3 months])
- Individuals with drug eluting stents (DES) placed within one year or bare metal stents (BMS) or plain angioplasty within 90 days unless acetylsalicylic acid and antiplatelet drugs will be continued by agreement of surgeon, cardiologist and anesthesia
- o Age 15 or younger
- Ongoing evidence of myocardial ischemia
- Poorly Controlled asthma (FEV1 < 80% despite medical management)
- Pregnancy
- o Prolonged surgery (> 3 hours)
- Resistant hypertension (Poorly Controlled)
- Severe valvular heart disease
- Sleep apnea (moderate to severe Obstructive Sleep Apnea (OSA)
- Uncompensated chronic heart failure (CHF) (NYHA class III or IV)
- II. A planned surgical procedure performed in a hospital outpatient department is considered medically necessary if there is an inability to access an ambulatory surgical center for the procedure due to ANY one of the following:
 - There is no geographically accessible ambulatory surgical center that has the necessary equipment for the procedure; or
 - There is no geographically accessible ambulatory surgical center available at which the individual's physician has privileges; or
 - An ASC's specific guideline regarding the individual's weight or health conditions that prevents the use of an ASC

When an elective surgery is requested at an inpatient hospital/medical center, this site may be considered medically necessary only when the patient has clinical conditions that places him or her at risk of complications. Examples include:

- Anesthesia risk
- Cardiovascular, liver, pulmonary, or renal risk
- Morbid obesity
- Pregnancy
- Bleeding disorder
- Anticipated need for transfusions

Applicable Codes

The following list(s) of procedure and/or diagnosis codes is provided for reference purposes only and may not be all inclusive. Listing of a code in this policy does not imply that the service described by the code is a covered or non-covered health service. Benefit coverage for health services is determined by the member specific contract and applicable laws that may require coverage for a specific service. The inclusion of a code does not imply any right to reimbursement or guarantee claim payment. Other Policies and Guidelines may apply.
