Last Approval Date: **08/06/2024** · Effective Date:**08/06/2024**

Disclaimer

These reimbursement policies serve as a guide to assist you in accurate claims submissions and to outline the basis for reimbursement if the service is covered by an Anthem member's benefit plan. The determination that a service, procedure, item, etc. is covered under a member's benefit plan is not a determination that you will be reimbursed. Services must meet authorization and medical necessity guidelines appropriate to the procedure and diagnosis, as well as to the member's state of residence.

You must follow proper billing and submission guidelines. You are required to use industry standard, compliant codes on all claim submissions. Services should be billed with Current Procedure Terminology (CPT) codes, Healthcare Common Procedure Coding System (HCPCS) codes and/or revenue codes. These codes denote the services and/or procedures performed and when billed, must be fully supported in the medical record and/or office notes. Unless otherwise noted within the policy, our reimbursement policies apply to both participating and non-participating professional providers and facilities.

If appropriate coding/billing guidelines or current reimbursement policies are not followed, Anthem may:
- Reject or deny the claim.
- Recover and/or recoup claim payment.

These reimbursement policies may be superseded by mandates in provider, state, federal, or Centers for Medicare & Medicaid Services (CMS) contracts and/or requirements. We strive to minimize delays in policy implementation. If there is a delay, we reserve the right to recoup and/or recover claims payment to the effective date, in accordance with the policy. We reserve the right to review and revise these policies when necessary. When there is an update, we will publish the most current policy to the website.

Policy

Anthem allows reimbursement for a procedure or service that is distinct or independent from other services performed on the same day by the same provider when billed with Modifier 59, XE, XP, XS, or XU, (collectively known as X{EPSU}), unless provider, state, federal, or contracts and/or requirements indicate otherwise.

Empire follows CMS National Correct Coding Initiative (NCCI) Procedure-to-Procedure (PTP) edit guidelines.

Reimbursable:
- National Correct Coding Initiative (NCCI) Column 1/Column 2 edits; Modifiers 59 or X{EPSU} may be appended to the paid or denied code
- Modifier 59 should only be used if no more descriptive modifier is available, such as, XE, XP, XS, and XU.
- Modifier 59 should not be appended to the same claim line item as X{EPSU}

Anthem reserves the right to perform post-payment review of claims submitted with Modifier 59 and X{EPSU}. We may request that providers submit additional documentation, including medical records or other documentation not directly related to the member, to support claims submitted by the provider. If documentation is not provided following the request or notification, or if documentation does not support the services billed for the episode of care, we may:

- Deny the claim
- Recover and/or recoup monies previously paid on the claim

Anthem is not liable for interest or penalties when payment is denied or recouped because the provider fails to submit required or requested documentation.

Nonreimbursable:
Anthem does not allow reimbursement for Modifiers 59 X{EPSU} in the following circumstances:
- When the denial of a code is supported by CPT parenthetical language that indicates a code is not reportable "with" specific other codes
- When multiple procedures are performed on the same anatomical digit, by the same provider, during the same operative session.
  - Modifiers FA, F1-F9 and TA, T1-T9 should be appended to applicable site specific services.
- The code (s) listed in the first column when reported with the code(s) listed in the third column of the Related Coding table.

Definitions

Modifier 59	Modifier 59 is used to identify procedures/services, other than E/M services, that are not normally reported together, but are appropriate under the circumstances. Only if no more descriptive modifier is available, and the use of modifier 59 best explains the circumstances, should modifier 59 be used. Modifier 59 should not be appended to an E/M service
Modifier XE	Separate encounter, a service that is distinct because it occurred during a separate encounter
Modifier XP	Separate practitioner, a service that is distinct because it was performed by a different practitioner
Modifier XS	Separate structure, a service that is distinct because it was performed on a separate organ/structure
Modifier XU	Unusual non-overlapping service, the use of a service that is distinct because it does not overlap usual components of the main service

Procedure Unbundling	When two or more procedure codes are used to describe a service when a single, more comprehensive procedure code exists that more accurately describes the complete service performed. Procedure unbundling edits include three components: Incidental, Mutually Exclusive, and Rebundling.

Use of Reimbursement Policy

State and federal law, as well as contract language, including definitions and specific inclusions/exclusions, take precedence over Reimbursement Policy and must be considered first in determining eligibility for coverage. The member's contract benefits in effect on the date that services are rendered must be used. Reimbursement Policy is constantly evolving and we reserve the right to review and update these policies periodically.
